To FCC Chairman Julius Genachowski,

I strongly urge you deny Verizon SpectrumCo, to require 700 MHz Interoperability between carriers, and encourage the Librarian of Congress and Registrar of Copyrights to support renewing the DMCA exemption for legally jail-breaking smart-phones set to expire, extend it to cover tablet computers and to support a similar DMCA exemption for general purpose computer operating systems (Windows, Mac OS X, Linux) that run on desktops and laptop computers.

As such I have previously filed comments and reply comments with the Copyright Office encouraging the renewal and extension of DMCA exemptions for smart phones to also include tablets and to support an exemption for general-purpose computers. I have commented on proposed classes of works #4 and #5. Thanks for considering my comments.
