

I write to voice my support for the Wright petition. I volunteer every week in a women's correctional facility and see firsthand the impact on parents and children of disrupted family relationships. I have witnessed how bureaucratic structures limit inmates' ability to maintain positive relationships with those closest to them. This is destructive to our nation's social fabric and totally inconsistent with strongly asserted pro-family values from all sides of the political spectrum. I urge expedited action that facilitates family contact for inmates via telephone.
