For Determination of Effective Competition in: 7 Delaware, New Jersey-Area Franchise Areas	))	CSR No. _____

PETITION FOR SPECIAL RELIEF

Comcast Cable Communications, LLC, on behalf of its subsidiaries and affiliates ("Comcast"), pursuant to Sections 76.7 and 76.907 of the Commission's rules,[1] requests that the Commission find that Comcast faces "effective competition" in 7 New Jersey franchise areas (the "Franchise Areas").[2]

The Communications Act of 1934, as amended (the "Act"), and the Commission's rules provide that cable television rates may be regulated only in the absence of effective competition.[3] Cable operators are entitled to demonstrate that effective competition exists on a franchise-by-franchise basis.[4] When a cable operator demonstrates that effective competition exists within a franchise area, cable rates in the affected area are no longer subject to regulation.[5]

[5] *See Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992, Rate Regulation*, 8 FCC Rcd. 5631, 5664-5665 (1993) ("*Rate Order*").

Under the "competing provider" test set forth in Section 623(1)(1)(B) of the Act and Section 76.905(b)(2) of the Commission's rules (the "Competing Provider Test"), a cable system will be deemed subject to effective competition if:

(i) the franchise area is served by at least two unaffiliated multichannel video programming distributors ("MVPDs"), each of which offers comparable programming to at least 50 percent of the households in the franchise area; and

(ii) the number of households subscribing to multichannel video programming other than the largest MVPD exceeds 15 percent of the households in the franchise area.[6]

As demonstrated below, the Competing Provider Test is easily satisfied in each of the Franchise Areas -- Delaware, Ewing, Hopewell (Borough), Hopewell (Township), Lawrence, Pennington, and West Amwell - because two unaffiliated DBS providers serve over 50 percent of the Franchise Area's households with programming comparable to Comcast, and the aggregate penetration rate reported for all "competing providers" far exceeds the 15 percent threshold in each of the Franchise Areas.[7]

I. THE COMPETING PROVIDER TEST IS SATISFIED IN EACH OF THE FRANCHISE AREAS

The two prongs of the Competing Provider Test are straightforward and objective. Both prongs of this test are clearly satisfied in each of the Franchise Areas.

[6] 47 U.S.C. § 543(1)(1)(B)(i) and (ii); 47 C.F.R. § 76.905(b)(2)(i) and (ii).

[7] In the Delaware and West Amwell Franchise Areas, Comcast is relying solely on DBS subscriber data. As explained below, in the Ewing, Hopewell (Borough), Hopewell (Township), Lawrence, and Pennington Franchise Areas, the competing penetration figure includes subscribers from local MVPD competitor Verizon, as well as from the two major DBS providers.

A. Multiple Unaffiliated MVPDs Offer Programming Comparable to Comcast to Over 50 Percent of the Households in the Franchise Areas.

The first prong of the Competing Provider Test requires that a franchise area must be served by "at least two unaffiliated multichannel video programming distributors..."[8] This requirement is easily satisfied, because the two major direct broadcast satellite providers (DirecTV, Inc. and Dish Network, Corp.) ("DBS Providers") are both unaffiliated with Comcast and both "offer" programming that is comparable to Comcast to more than 50 percent of the households in Comcast's Franchise Areas.

Service of an MVPD is deemed "offered" under the Competing Provider Test when it is both *technically* and *actually* available.[9] The Commission has determined that DBS service is presumed to be "technically available" throughout the country due to its nationwide satellite footprint.[10] Comcast's Franchise Areas are well within the satellite footprint of DirecTV and Dish Network. Thus, both DirecTV and Dish Network are "technically available" in the Franchise Areas.

DBS service is presumed to be "actually available" if households in a franchise area are made "reasonably aware" that the service is available.[11] The Commission has stated that "a party may use evidence of penetration rates in the franchise area (the second prong of the competing provider test ...) coupled with the ubiquity of DBS services to show that consumers are

reasonably aware of the availability of DBS service."[12] The same reasoning applies here. DirecTV and Dish Network are among the largest MVPDs in the nation.[13] With approximately 33.8 million subscribers nationwide,[14] comprising more than 33 percent of all MVPD subscribers,[15] ubiquitous advertising, and the substantial DBS penetration figures in the Franchise Areas, it is clear that consumers in the Franchise Areas are "reasonably" aware of the availability of DBS competitors.[16]

Thus, the Commission has not required the production of advertising to demonstrate that households in the franchise area are "reasonably aware" of the availability of DBS service. *See Bright House Networks, LLC Petition for Determination of Effective Competition (Lake Alfred and Dundee FL)*, 22 FCC Rcd. 4390, ¶ 6 (2007) ("Over more than ten years, we have made hundreds of findings that households in particular franchise areas are reasonably aware that they may purchase DBS services based on localized evidence. These accumulated showings amount to substantial evidence that households in all franchise areas are reasonably aware that they may purchase DBS services. In at least one earlier reported decision, we found households in a franchise area to be reasonably aware that they may purchase DBS service solely based on evidence of DBS's nationwide growth and local subscriptions, without reference to advertising or other promotion.") The Competing Provider Test also requires that the programming offered by the competing providers must be "comparable" to the programming offered by the cable operator.[17] The Commission's rules define comparable programming as "at least 12 channels of video programming, including at least one channel of nonbroadcast service programming."[18] The Commission has repeatedly recognized that the DBS Providers offer comparable programming to Comcast under the Commission's Competing Provider Test.[19] Each of the DBS Providers offer well over 100 video channels, most of which are non-broadcast services.[20] And, as shown in the attached channel line-up, Comcast's programming service offerings in the Franchise Areas are substantially similar to the DBS programming services.[21]

Based on the above facts, Comcast has satisfied the first prong of the Competing Provider Test.

B. The Competing Providers Serve Greater Than 15 Percent of the Households In Comcast's Franchise Areas.

The second prong of the Competing Provider Test requires that the subscriber base of competing MVPDs (other than the largest MVPD) exceeds 15 percent of franchise area households. The Commission's rules provide that once the first prong of the Competing Provider Test is satisfied (as it is with the DBS service offerings in this case) the subscribers of *all* qualifying MVPDs count toward the 15 percent penetration figure necessary for a

determination of effective competition (even if they are not available themselves to more than 50 percent of local households).[22] Verizon offers competing cable service in the communities of Ewing, Hopewell (Borough), Hopewell (Township), Lawrence, and Pennington.[23] Accordingly, the Competing Provider subscriber tallies presented in this Petition for these Franchise Areas include subscribers from Verizon,[24] as well as from the two major DBS providers.[25] The resulting penetration figures easily exceed the 15 percent threshold in each of the Franchise Areas:

Delaware	20.13%
Ewing	51.48%
Hopewell (Borough)	56.04%
Hopewell (Township)	54.49%
Lawrence	38.17%
Pennington	62.46%
West Amwell	18.33%

Because DBS Providers track their subscribers according to the zip codes where each subscriber resides (rather than by political jurisdiction), Comcast relied on ZIP+4 codes associated with each of the Franchise Areas to determine the number of local DBS subscribers. The Commission has previously accepted the use of a ZIP+4 analysis as "reasonable and

[23] Verizon's "comparable" channel lineup is set forth in Exhibit 4.

[24] Comcast obtained Verizon's subscribership data for the Franchise Areas directly from Verizon, and such data was provided to Comcast on the condition that Comcast seek confidential treatment with respect to such information. Thus, Comcast submits Verizon's subscriber figures for the relevant Franchise Areas as **Confidential Exhibit 5** to this Petition (with a redacted version attached).

[25] In contrast to the Competing Provider tallies for Ewing, Hopewell (Borough), Hopewell (Township), Lawrence, and Pennington, which include Verizon subscribership numbers, the Competing Provider subscriber tally in the Delaware and West Amwell Franchise Areas relies solely upon data from DirecTV and Dish Network.

sufficiently reliable for purposes of determining the presence of effective competition,"[26] and has stated its preference for this approach.[27]

To determine the relevant ZIP+4 codes for the Franchise Areas, Comcast contacted Media Business Corp. ("MBC," previously known as "SkyTrends"). MBC has developed a process to accurately identify the ZIP+4 codes that correspond with the political boundaries of a particular community. This process utilizes enhanced mapping software that correlates ZIP+4 codes with the U.S. Census Department's "block group" level households. The "block group" measurement is the most precise Census tool available to measure households within a very small geographical area. With this software, MBC was able to identify the ZIP+4 codes that lie within each of the Franchise Areas.[28]

Comcast next provided all of the ZIP+4 codes for the Franchise Areas to the Satellite Broadcasting and Communication Association ("SBCA"). SBCA is the national trade association representing the two major DBS Providers, and it has assumed the responsibility for compiling subscribership data and responding to data requests from cable operators and franchising authorities engaged in effective competition proceedings. The DBS subscriber numbers reported in the attached Effective Competition Tracking Reports ("ECTR") from SBCA

[27] *See* Public Notice, "Commission Announces New Standards for Showings of Effective Competition For Cable Service," 23 FCC Rcd. 12067 (2008). The Commission stopped short of requiring ZIP+4 evidence in effective competition cases. *See* Public Notice, "Commission Clarifies Standards for Evidence of Competing Provider Effective Competition for Cable Service," DA 09-1361, 24 FCC Rcd. 8198 (2009).

reflect the total DBS subscribers within the individual ZIP+4 codes associated with each of the Franchise Areas.[29]

Finally, Comcast compared the DBS subscribership figures reported by SBCA on a ZIP+4 basis with its own subscribership, and was able to confirm that its own subscribership exceeded DBS subscribership in 3 of the 7 communities that qualify for effective competition under the Competing Provider Test – Delaware, Lawrence, and West Amwell. Comcast is the largest MVPD in these Franchise Areas.

In the Ewing, Hopewell (Borough), Hopewell (Township), and Pennington Franchise Areas, Comcast serves in excess of 15 percent of the households, while competing providers serve 51.48 percent, 56.04 percent, 54.49 percent, and 62.46 percent, respectively. The Commission has recognized that where "the subscribership penetration for both [the cable operator] and the aggregate DBS information each exceed 15 percent in the franchise area, the second prong of the competing provider test is satisfied."[30] Thus, it is immaterial in these Franchise Areas which MVPD is the largest, because both competing providers (as shown below) and cable readily pass the 15 percent threshold.

To determine whether the DBS (and, where appropriate, the combined DBS and Verizon) subscribership exceeds the statutorily mandated 15 percent threshold in the Franchise Areas, Comcast compared the Competing Providers' combined subscribership to the most recent U.S.

[29] *See* **Confidential Exhibit 7.** This exhibit includes all of the relevant ZIP+4 data relied on in the Petition and the total ZIP+4-based DBS subscribership for each of the Franchise Areas. Comcast is providing a redacted version of this exhibit, which excludes the DBS subscribership numbers corresponding to the Ewing, Hopewell (Borough), Hopewell (Township), Lawrence, and Pennington Franchise Areas, in order to present the *aggregate* DBS and Verizon subscriber penetration figures and still maintain the confidential nature of the Verizon subscribership tallies for these communities.

Census occupied household unit figures for each community.[31] This comparison yields the aggregate penetration rates for Competing Providers in each of the Franchise Areas.

As detailed in **Confidential Exhibit 9**, the subscriber penetration rate for the Competing DBS Providers in the Delaware and West Amwell Franchise Areas exceeds the 15 percent threshold required under Section 623(1)(l)(B) of the Act. Likewise, the *aggregate* subscriber penetration rates for the DBS Providers and Verizon in the Ewing, Hopewell (Borough), Hopewell (Township), Lawrence, and Pennington Franchise Areas easily exceed the 15 percent threshold.[32] Accordingly, Comcast meets the second prong of the Competing Provider Test in each of the Franchise Areas.

Because Comcast meets both prongs of the Competing Provider Test in the Franchise Areas, it faces effective competition in each of the Franchise Areas.

CONCLUSION

Comcast has demonstrated herein that it is subject to effective competition in each of the seven Franchise Areas under the Competing Provider Test. Based on the evidence presented herein, Comcast respectfully requests that the Media Bureau issue an order acknowledging the

To Whom It May Concern:

Media Business Corporation ("MediaBiz") utilizes a multi-step process to accurately identify cable client franchise areas and associated ZIP and ZIP+4 Codes. (A ZIP+4 Code includes the five digits of the United States Postal Service ZIP Code, a hyphen, and four more digits that determine a more precise location than the ZIP Code.)

MediaBiz developed this methodology to address the potential shortcomings in utilizing 5-digit ZIP Code data for "Effective Competition" petitions. This basic methodology has been in place for several years and has been used successfully in many Effective Competition cases at the FCC.

Because ZIP Codes and municipal boundaries are created and managed by different government authorities, the boundaries of ZIP Codes and municipal boundaries often overlap. ZIP Codes frequently span between and beyond municipal boundaries. ZIP+4 Codes, however, usually reside in one and only one municipality. MediaBiz uses Place, Minor Civil Division (MCD), and County boundaries from Dynamap®, a division of Pitney Bowes Business Insight, to determine municipal boundaries. MediaBiz uses the Dynamap® ZIP+4 Centroids database, which contains ZIP+4 centroid correspondence for virtually all deliverable ZIP+4s, to identify ZIP+4 Codes within municipal boundaries, among the over 60 million ZIP+4s in all 50 states, DC, and Puerto Rico, based on current data from the USPS and the U.S. Bureau of the Census, and the Tele Atlas master street database.

MediaBiz then utilizes its ZIP+4 Code mapping to enable our clients to obtain proper "Direct-to-Home" (DTH) subscriber counts for their respective franchise areas by tracking DTH subscribers at the ZIP+4 Code level. (Where MediaBiz determines that a ZIP Code falls entirely within a franchise area, however, it is unnecessary to identify DTH subscribers at the ZIP+4 Code level for that 5-digit ZIP Code. In these instances, MediaBiz identifies such 5-digit ZIP Codes and, accordingly, DTH subscribers are identified by the 5-digit ZIP Code only.

Only ZIP+4 Codes that meet specific criteria are included in this report. The following criteria must be met:

- The centroid of the ZIP+4 Code is within the franchise area; and
- The USPS ZIP+4 Record Type (from Dynamap® ZIP+4 Centroids) is either H - high-rise or S – street

Our methodology has been used by many multiple system operators (MSOs) as part of their Effective Competition relief efforts, and we believe this methodology produces the most accurate and detailed view of ZIP+4 data as it relates to cable franchise areas.

Methodology: Direct-To-Home (DTH) subscriber data reflects aggregated DIRECTV and DISH Network residential subscriber totals. The following data collection procedures are applied by Members in the normal course of business: a) single accounts with multiple receivers are only counted once; b) commercial and test accounts are not included; c) each occupied unit served in a multiple dwelling unit building has been counted as a separate residential subscriber; d) zip codes are taken from service locations (not billing addresses, where different); e) inactive accounts are routinely removed; f) invalid (undeliverable) addresses have been corrected where known; g) courtesy or complimentary accounts are included; and h) zip code information for Members' subscribers is periodically updated to reflect changes to zip codes by the United States Postal Service.

Methodology: Direct-To-Home (DTH) subscriber data reflects aggregated DIRECTV and DISH Network residential subscriber totals. The following data collection procedures are applied by Members in the normal course of business: a) single accounts with multiple receivers are only counted once; b) commercial and test accounts are not included; c) each occupied unit served in a multiple dwelling unit building has been counted as a separate residential subscriber; d) zip codes are taken from service locations (not billing addresses, where different); e) inactive accounts are routinely removed; f) invalid (undeliverable) addresses have been corrected where known; g) courtesy or complimentary accounts are included; and h) zip code information for Members' subscribers is periodically updated to reflect changes to zip codes by the United States Postal Service.

mesteves@sbca.org

Methodology: Direct-To-Home (DTH) subscriber data reflects aggregated DIRECTV and DISH Network residential subscriber totals. The following data collection procedures are applied by Members in the normal course of business: a) single accounts with multiple receivers are only counted once; b) commercial and test accounts are not included; c) each occupied unit served in a multiple dwelling unit building has been counted as a separate residential subscriber; d) zip codes are taken from service locations (not billing addresses, where different); e) inactive accounts are routinely removed; f) invalid (undeliverable) addresses have been corrected where known; g) courtesy or complimentary accounts are included; and h) zip code information for Members' subscribers is periodically updated to reflect changes to zip codes by the United States Postal Service.
