CC Docket 02-6
 SLD-765964

Dear Mark:

In response to your request for clarification on cell phone usage for recruitment purposes.

- 1) The calculations provided to you and listed as ineligible already accounted for some level of usage for recruitment purposes.
- 2) Please see attached grid that was added to AT&T mobility for SPI, where it indicates 4 additional lines from another account, that was to be added to our discounted billing per our FCDL, at an eligibility level of 30%.
 These are cell phone numbers of the school board and personnel (working with the school's parent agency, for which a DBA was provided) primarily involved with recruitment. So after making a 50/50 proportionality, for our school and for other private and agency use, I further reduced the school use by almost half for ineligible school uses as well.
 Although AT&T originally credited that account, it was denied by USAC and the credit was reversed.
 I never pursued an appeal on those accounts, as this all proves to be very time consuming for me.
- 3) With regard to the other 2 accounts (later merged into 1) which we have been discussing previously, the cell phone usage for which we are seeking coverage was mainly conversations between teachers & the parents of students regarding their performance, homework etc, between staff and administration regarding curriculum, schedules, available school resources such as facilities, educational equipment, medical issues etc. and between staff members themselves regarding all education issues, materials, resources etc.

I hope this answers your questions and concerns adequately.

Sincerely,

Levi Zarchi
