

The Verizon SpectrumCo deal is more than just spectrum unlike AT&T Qualcomm and is for even more spectrum than the 12 MHz 700 MHz deal AT&T made with Qualcomm. Unlike AT&T Qualcomm the Verizon SpectrumCo deal includes anti competitive marketing agreements and includes an excess spectrum of 20 MHz of AWS spectrum. The FCC's review which is supposed to last 6 months on this deal is also shorter than the AT&T Qualcomm deal that got tied to the review of AT&T's doomed T-Mobile merger.
