

in hood river ore the only channel that comes off of underwood tower in washington is channel12. we went and bought the digital box the federal gov. had us buy and since this time we lost channel2,6,8, and the opb channel is this how you fix the problem and upgrade public safety? I am not the only one that is very disappointed in this waste of federal money not to mention the money out of our pocket only to get less than we had for service before this upgrade
