

I am tired of the indeterminable hacking that goes on at BPL. These men have no regard for the children that may be unduly harmed by their meddling. I came to the Library to send communications-timely and I received filtered warnings from unsolicited and unwarranted anonymous men. These computers are free to the general public but this behavior must be dealt with. Monitor all the computers and delay any further improvements to these systems. The treatment I received was undeserved. This was not spam.
