

Dear Sir,

I am recently receiving telemarketing phone calls from India.(7-24-2012, 7.00PM) I believe it is from (Gujarat, India) and they call couple times every day with different incoming caller ID numbers. Some time they show my own phone number as incoming numbers. These people are very annoying to sell. When I said I do not want and do not call me. Then they take as offensive and will speak bad words and or continuously calling. I told them I have registered do not call list and I will report complain to FCC. They told me that FCC can not do nothing to them. because they do not display their origin country code number. But It display as random numbers 525-247-8965, 8-569-006-9558, . I think that these people doing free calls using internet so they calling anytime and do not care. I do not know what FCC can do. (raising their incoming call fee)
