445 12th Street, S.W.
Washington, DC 20554

**Re: Amendment to *Ex Parte* Notification
WT Docket No. 12-40; RM No. 11510**

Dear Ms. Dortch:

On July 18, 2012, Julia K. Tanner, General Counsel of Broadpoint, LLC (“Broadpoint”), and the undersigned (collectively, the “Parties”) met with Division Chief Roger Noel and Lloyd Coward, Clay Decell, Keith Harper, Jay Jackson, Jr., Nina Shafran, and Denise Walter of the Mobility Division of the Wireless Telecommunications Bureau to discuss Broadpoint’s comments filed in the above-captioned proceedings.

Broadpoint discussed the points made in its Comments. It requested clarification that existing boundary extension agreements, particularly those relating to the Gulf of Mexico region, will remain effective upon the transition to geographic market-based cellular service. Broadpoint reiterated its position that in light of the unique nature of services, propagation characteristics and customer base in the Gulf of Mexico region, the Commission should maintain the field strength limits for land-based carriers and water-based carriers set forth in Section 22.911(a)(1) and Section 22.911(a)(2) of the Commission’s rules, or in the alternative, adopt a uniform field strength limit of 32dbu for the border area in the Gulf of Mexico region. Finally, the Parties provided the Commission participants with the attached summary of Broadpoint and its operations in the Gulf of Mexico which can be found on Broadpoint’s website at <http://www.broadpointinc.com/public/pag1.aspx>.

If you have any questions or require any additional information, please contact the undersigned directly.

Respectfully submitted,

Todd Slamowitz
Counsel to Broadpoint, LLC

About Us

Broadpoint delivers an easy, flexible and complete range of wireless services to companies operating offshore in the Gulf of Mexico. A wholly-owned subsidiary of Cellular One, Broadpoint's cellular products and services also include antennae and tower services.

Broadpoint's energy and maritime customers face harsh environments that create a unique set of communication challenges. With the ability to customize solutions for a range of needs and budgets, Broadpoint provides the right level of reliable connectivity at the right price – coupled with an unmatched team of IT experts available to its customers 24/7.

Broadpoint is and always has been a leader in providing telecommunication services for the world's offshore markets by exceeding the energy and maritime industries' expanding needs for improved technology, more efficient and reliable service, and real time connectivity. Boundaries are a thing of the past for customers who rely on Broadpoint's expedient services.

Broadpoint's Offering:

Cellular. Broadpoint offers the world's first offshore digital wireless network based on the GSM technology platform. This extensive network services more than 100,000 square miles of the Gulf of Mexico and is available across much of the Western Hemisphere through roaming partners. The optimum mobility of Broadpoint's cellular products and services keep people and their data connected through voice, voicemail, texting, faxing, Internet, e-mail, data and low-volume SCADA.
