

Mr Chairman, Why did you not allow the purchase of T-mobile By AT&T, I see how many organizations supported the merger, They share many towers, their operating costs would have gone down to hire more people. You are an appointed position controlling a private organization. Why did you also allow DSL to take ideas from others and give them to Facebook Including texting. In the good ole days you couldn't say bang a bong nor could you say 69 tears, it was changed to the song 96 tears, you are supposed to mentor the children and instill family values with family oriented music and video. Are you working on fining and confiscating the property of those who have no moral ethics, also do you control who is assigned what bandwidth, Is this done fairly. I would like to see the Chairmans that previously had your position alive and retired and see what they have to say. Thank You For Taking Time To Read my oppinion on this sensitive topic. Remember you have a big role in decreasing unemployment it is unacceptable to see the rate so high, Friday will show more reports. Mr John C Paray 08/06/2012
