

Comment on Draft Eligible Services List for Schools and Libraries Universal Service Fund for funding year 2013:

Could the commission provide further clarification of eligible telecommunications services? Public notice DA12-1052 states "We reinsert the phrase "commerically available" into the proposed ESL for 2013 to clarify that that supported telecommunications services provided by telecommunications carriers include all commercially available telecommunications services; this language is taken verbatim from the Commission?s rules"

While this statement is made in the Public Notice, I do not find it in the draft ESL.

Based on this statement, it appears any "commercially available" telecommunications service (voice/data/digital/analog/landline/wireless) would be eligible. Please clarify.

Thanks.
