

The GOP's plan to raise taxes on the poor and middle class so they can afford to keep the Bush era tax cuts for the rich and cut taxes for the rich even further is unfair and wrong. Furthermore, to allow big telecoms and cable companies to shirk their financial responsibility in paying their fair share of taxes and to pass on their tax obligations instead to the middle class via taxes for USF/Connect America Fund is not acceptable. If the middle class is paying their fair share of taxes including payroll, income, property, and even USF through their monthly phone (including cellular phones) and/or Internet bills giant corporations should pay their fair share of taxes too.
