

I thought monopolies were against the law in this country! Since breaking up Ma Bell, the phone companies have all come together to create one big monopoly, giving us no choice but to have to pay outrageous prices with no other choice given to us. Now Verizon, Time-Warner, and Com-cast want to create another monopoly, once again limiting our choices! Without competition there is no reason to do research to improve product. There is no reason to have fair customer policies, after all, where else can a customer go for their services! And there is no price control! Competition is what drives fair prices!

I write this to implore you to deny the petition of Verizon, Time-Warner, and Com-cast to create this monopoly! We must keep competition alive to continue to have a robust economy!

Thank you for your time,

Viviann Choate Ht.
