

I would like to let it be known that the Verizon cable co spectrum deal is bad for everyone. This hurts competition and cut down on investment in new technologies for all parts of the country. This is not a time where you should be helping the companies cut jobs in this country. That is Verizon main goal is to cut jobs to give bigger raises to the CEO and top executives. Deregulation has hurt this country with telephone and electric companies not investing because the government doesn't hold them responsible.
