

Hello,

The FCC needs to protect the ability for consumers to have choices. That is why the FCC needs to stop the deal between Verizon, Time Warner, and other cable companies. This will only create a monopoly with less choice in internet and cable, and higher prices. Where I lived previously, I only had 1 choice in cable internet, and so Time Warner's service was sloppy, slow, and intermittently turned off- but i had no other option. In Maryland, with many options, prices are lower, and internet is faster. Please help consumers and don't let the deal go through.
