

Great State of "Third World Communications" of New York!

I live in an area with no Cable, spotty wireless (The VZ map is a lie. You can see where requests for service is denied and the property is white, no coverage, instead of red for service.), and stone age dial up internet.

There are many websites that will not download on a dial up connection. Facebook is one.

Imagine what will happen when there is NO CHOICE.

Larry Lubonty
