

I am vehemently against this Verizon/Comcast/Time Warner deal going through as it will cost the consumers way too much money. Giant corporations are hurting the average consumer and this is just another notch in their bedpost of robbing us blind. Please think of the regular people like me; I'm 27 and working to support my wife who is going through grad school to become a teacher. This deal going through will hurt us greatly as it will raise costs and eliminate competition.
