

Again as always politicians find a way to violate our Constitution and the right to privacy. In reality every business, every government, your AMA, the Oil Cartel, the Pharmaceutical Industry, and the Communications Industry and etc. all have one Goal and one thing in common and that is control over the individual and the entire population. This will not end - it will escalate into one thing will control all. Think about it carefully, do the research past to present and tell me if any thing has changed. No! They just got more intelligent and better technology.
