

I am voicing my concern towards the action of Verizon and big cable companies merger because it will damage consumers right to pick a provider that is affordable during these financial crisis. People who work and struggle to pay for their utilities shouldn't have to suffer more just because companies want to profit more in their pockets while middle class citizens have to pay extra on their cable or satellite bill. These actions can cause issues with not only the consumers but the provider as well. Increasing your pockets will not save your company quarterly quotas but decrease in your consumers upon making such action. Please take the time to consider and not proceed in these actions. Let us have the freedom to pick among providers and allow us to have service for a reasonable price.
