

I am writing to the FCC once again, to urge them NOT to allow Verizon, Comcast, and Time Warner to complete their cable deal. That is collusion; it's illegal, it's immoral, and it runs counter to the very idea of capitalism. Cable bills will skyrocket and hundreds of millions of consumers will have no recourse and no choice in service.

Verizon must be required to build its FiOS network. There has to be competition in the telecommunications industry. Otherwise, only the super-rich can afford service, quality goes out the window for the few who still CAN afford to have it, and the whole system collapses, and all in the name of providing short-term satisfaction for corporate greed.

Do not allow them to stop competing and sell each other's products.
