

You should require Verizon to build the FiOS network, not allow these companies to sell each others products. If this deal between Verizon Wireless and large cable companies goes through, it will end competition, destroying jobs and local economies and driving up the price of every consumers cable bill. Consumers will lose the freedom to choose between providers and too many communities will lose the chance to connect to a high-speed future. Conumers need cable competition, jobs and investment, not a new monopoly.
