

Utilities, schools, and health care

Water is derived from Lake Bonnie Rose, Lake De Marie, and Nurses Creek, stored in seven water tanks throughout the community, and piped to facilities and housing units. The wastewater treatment system discharges through a marine outfall line to Kuluk Bay. The permitted landfill, Roberts Landfill, is a Class 2 with balefill. Electricity is provided by TDX Adak. There is one school located in the community, attended by 18 students.

Local hospitals or health clinics include Adak Community Health Center, managed by Eastern Aleutian Tribes, Inc (EAT). The health center provides Family Medicine, Chronic Care and Acute Emergency Care services and is staffed by a physician's assistant and a community health practitioner. Behavioral Health is also provided via tele-video and quarterly site visits. EAT sends a Dentist one week per year to provide limited dental services, otherwise, dental services must be referred outside of Adak. Tele-Radiology(Xray)and Tele-Medicine are also present. Limited lab, pharmacy, and public health services are also available. The pharmacy medications are limited to acute medications. Filling of prescriptions from outside facilities can be accommodated. However, all visitors should bring plenty of their own medications as the health center stocks a very limited supply of chronic medications. Adak is classified as an isolated town/sub-regional center, located in EMS Region 2H in the Aleutian/Pribilof Region. Emergency Services have coastal and airport access to Adak. Auxiliary health care is provided by Adak Volunteer Fire Department/EMS.

Facilities, economy and transportation

A land exchange between Aleut Corp., the U.S. Navy, and the Department of the Interior transferred most of the former naval facilities to the Aleut Corp. in March 2004. A portion of the island remains within the Alaska Maritime National Wildlife Refuge, managed by the United States Fish and Wildlife Service. The U.S. Navy retains part of the north end of Adak Island (Parcel 4) and does annual sweeps of the Andrew Lake Seawall for unexploded ordnance. Their website lists the Institutional Controls in place for all of Adak as part of the land exchange or Interim Conveyance. The Navy provides the trail maps as part of the ordnance awareness information required to be shown to all Adak residents and visitors. Adak currently provides a fueling port and crew transfer facility for a combination of Seattle and Alaskan based fishing fleet — an airport, docks, housing facilities, restaurant, grocery, and ship supply store are available. Adak Fisheries, LLC, an employer of a large seasonal staff, processes Pacific cod, pollock, mackerel, halibut, snow and king crabs. Four residents hold commercial fishing permits, primarily for groundfish. However, commercial fishing vessels based out of Seattle and other parts of Alaska provide most of the work for the fish plant by regularly offloading their catch in Adak.

Because of its naval aviation past, Adak has an unusually large and sophisticated airport for the Aleutian Islands. The airport is currently operated by the State of Alaska Department of Transportation. Complete with an Instrument Landing System, Adak Airport has no control tower and two 200' wide asphalt paved runways at 19' elevation. One runway measures 7,790' long while the other runway measures 7,605'. Alaska Airlines operates twice weekly 737-400 Combi passenger and cargo jet service from Anchorage. At present, flights operate each Sunday and Thursday (weather permitting). Occasionally, extra seasonal flights are operated to meet the demand of the fishing season. Other facilities in Adak include three deep water docks and fueling facilities. The city has requested funds to greatly expand the Sweeper Cove small boat harbor, including new breakwaters, a 315-foot (96 m) dock and new moorage floats. There are approximately 16 miles (26 km) of paved and primitive roads on Adak, all privately owned by the Aleut Corporation.

The Aleut are also seeking to develop the water system which has been well maintained and designed for a larger Naval population as an export industry.

Tourism

Land use permits are required for all non-residents visiting Aleut Corporation land. Permits can be obtained from the Aleut Enterprise LLC office in Anchorage, or from the Harbormaster at the Port of Adak.

Aleutian Housing Authority (AHA) is the only provider of lodging on Adak, and offers both long-term and short-term accommodations in former Naval officer housing. Housing units are heated, furnished, and include local telephone and cable TV service. It is advisable to make reservations in advance.

The cabins once maintained within the Alaska Maritime National Wildlife Refuge have fallen into disrepair and are unsafe to occupy. The cabin at Three Arm Bay sits on an archaeological site that was transferred to the Aleut Corporation, and is no longer available for rental to the general public.

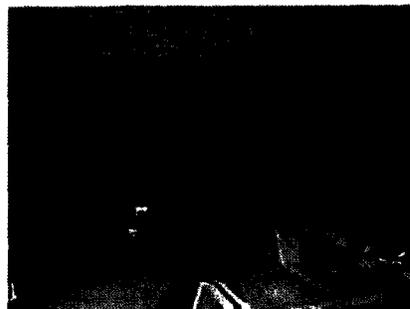

Camping is possible without a permit on Alaska Maritime National Wildlife Refuge lands, but is generally not recommended due to the harsh climate. The wind on Adak is highly variable and often unpredictable. Gusts can exceed 100 knots (190 km/h) or more (the record speed is unknown because the wind ripped the anemometer off of the tower). During the calmer summer months, sustained wind speeds average in the low double digits gusting to 50 knots (93 km/h) or more.

Adak offers 16 miles (26 km) of paved and gravel roads. These can be explored on foot, by bicycle, or by renting a truck. There is only one vehicle rental business on Adak.

Hunting and fishing are bountiful sports in Adak. Hunters particularly prize Adak caribou, the largest of which can exceed 700 pounds. There is no bag limit for cows, but in 2007, the Board of Game passed new regulations for bulls. If you want to get to the South end of the island where the majority of the caribou are there are currently two licensed local boat charter services - Aleutian Adventure Tours and Homeward Bound Charters. Anglers can find large to enormous halibut in the Kagalaska Straits. Hunters must possess an Alaska state hunting license and a harvest ticket for each animal taken. Non-residents of Alaska must also possess the appropriate big game tag. Anglers require a sport fishing license. All areas of the island with roads are owned by the Aleut Corporation, and a special permit is required for all non-residents accessing this private property. No ATVs are permitted within the wildlife refuge and the Aleut Corporation only allows ATVs on the roads and trails - not on the tundra. Under Alaska state law, wastage is illegal.

Audubon enthusiasts generally do not consider Adak as exciting as Attu. That being said, the high winds are a blessing for birders; many vagrants from Asia and elsewhere can be spotted. Indigenous (but often rare) shore birds abound, and eagles are ubiquitous. Visitors not insistent upon scoring "First North America" sightings will find plenty of variety to enjoy.

Developed trails are limited and most are not maintained. It is possible to hike on the tundra, but visitors are advised both to prepare for frequent weather changes and to never hike alone.

At Kuluk Bowl for bowling August 2007

Nightlife and dining opportunities are few on Adak. The Aleutian Sports Bar and Grill (aka ASBAG) is located in the former VFW hall. In addition to a fully licensed bar, ASBAG offers a typical bar menu. Across town is a liquor store. Adak General Store operates out of the former Housing Community Center, as does the Cold Rock Cafe which is open for breakfast and lunch during weekdays only. The bowling alley (Kuluk Bowl), as of 2009, opens for summers only.

Education

Adak is served by the Aleutian Region Schools.

The Adak School serves grades K-12.

X Not applicable.

[1] Other Asian alone, or two or more Asian categories.

[2] Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories.

[3] One of the four most commonly reported multiple-race combinations nationwide in Census 2000.

[4] In combination with one or more of the other races listed. The six numbers may add to more than the total population, and the six percentages may add to more than 100 percent because individuals may report more than one race.

[5] This category is composed of people whose origins are from the Dominican Republic, Spain, and Spanish-speaking Central or South American countries. It also includes general origin responses such as "Latino" or "Hispanic."

[6] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner."

[7] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[8] The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, vacant units that are "for sale only," and vacant units that have been sold but not yet occupied; and then multiplying by 100.

[9] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units "for rent" by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.
