

This letter is a Request for Review Waterloo School Districts form 486 (898637) notification letter for funding year 2011. We are appealing the service start date of 2/29/2012 for all of the funding requests.

We received a letter on March 13, 2012 from the USAC and immediately called USAC for assistance in filing the form. We were told by the USAC representative that we already submitted form 486 for funding year 2011 and we were told to disregard the letter we received. As it turned out we didn't have the form 486 filled out for FY 2011 and were not made aware of that until July and we immediately filed the form.

This is not a case of a missed deadline. This is a case of us trying to correctly file the form, but we were given misinformation on March 13, 2012 by the USAC representative that no form needed to be filed because it had already been filed.
