

What a rip off! Set up a once in a lifetime local phone number through cons call home and GlobalTel still charged me \$18 a phone call. Saying that because the local number went to my cell that nothing could be done. What a lie, I paid for the local number and my minutes are for free. Please FCC fine this business till the turnip bleeds, they do nothing but cause interruptions with their prompts as well as causing you to lose considerable amounts of money. Alycia the love of my life! Was incarcerated for two weeks, which should have never happened and this business GlobalTel dropped her calls and just was no help to anyone but their business interests. Can you imagine being stuck some where you should never be and finally getting to speak with someone that loves and cares about you and then just get cut off from speaking to them. What a Nightmare this business is! Get them off the air, please. Then they even charge to refund the monies left on the account, God please strike these ruthless fools down.
