

The exclusion of WBTW and WMBF of Myrtle Beach from the Time Warner cable system in our area is Ludicrous. This area IS NOT a part of the Charleston market, it is part of the Myrtle Beach market. We depend on the local stations to provide emergency information to our residents and most cannot get it on cable. We cannot list local stations for emergency information as FEMA requires under it's CRS program. Local Advertisers are forced to pay for the Charleston Market though they only sell in the myrtle beach area. The "market" study on which this decision was made should be re-evaluated.

William Otis, Mayor, Town of Pawleys Island
