

London Woods Community has a "dead zone" with mobile wireless service. It's one way in and out of this community. Once out of the community you instantly have strong signal. If need be that will assist getting this resolved a petition signed by all tenants. It's a small community. Google map my address to get a better understanding, we are around woods, or send someone for a dry run. If they have more than 4 bars on their cell phone and while on the phone, then I guess it's my phone. Majority everyone in this area are outside because signal is stronger which is sad that it has to come that. Let me know what I need to do.

Thank You
