

I have been receiving calls from a number listed as 888-472-5886 indicating that they are calling from Nichols and Grant Law Firm. As I have received this call at my office and mobile as well, I know that this is a fraudulent call. When I alerted the caller on last evening that I knew them to be fraudulent, the individual proceeded to call my home number several times afterwards, indicating that it could go on all night. How does this get stopped and who can police this?
