

The purpose of this comment is to request a waiver to the Form 471 deadline for funding year 2012-2013. During the filing period the school district was in the process of switching email carriers and I was unaware that the deadline was fast approaching. As soon as the oversight was noticed, I filed the Form 470, waited the appropriate 28 days and then filed the Form 471 out of the window. Although the oversight was accidental, I would like to mention that in the four years I have filed a Form 470, I have never had a bid send to me for services so I don't usually have a lot of interaction during this time frame which might help explain why I did not think to get the Form 470 filed.

I would appreciate a review of my case and, if at all possible, a waiver of the deadline in this instance.

Thank you!
