

Respected Sir, Im utilising this option to file a complaint against an anonymous call that I have been receiving often at my home phone. The caller is very annoying and we can clearly make out it is a fraudulent call and claiming that they are calling to provide us a "government grant". Im unable to stop them or trace them and complain about them. I called up my telephone service provider Vonage and found the IP of the anonymous caller: RTP Relay 69.56.241.30:12326. Seeking you help to take action on this matter please.
