

Chairman Genachowski,

I am deaf and am composing my own message for the FCC. I want to be able to have variety to choose from, not a monopolized VRS system. It is hard enough not having easy access to communications but why make it harder" Please leave things as they are. It will be able to keep SEVERAL businesses running with plenty of people WITH jobs. The economy is hard enough and I do not want to see tech people and interpreters lose their jobs over this. So, please keep things as they are. Thank you
