

The recommendations made in this filing are detrimental to the VRS industry.

every other year you try and cut the rate-its very THIN as it is, vrs is a complex system that should be compensated appropriately.

The proposal for deaf to get their own VPs is outlandish. The quality for us interpreters will suffer so bad and so will the access.

Please throw these recommendations out of the conversation. You are hurting the interpreting community and the deaf community.

VRS is the livelihood for many families in my area and that is threatened by proposals like this that make no sense.
