

I like to comment about CSDVRS. I support their idea because SorensonVRS abused interoperability between videophones. My friends having nTouchVP are not able to make a call to me using Ojo, VPAD and MVP. I love those devices. Plus I did not use VP200 for VRS much and SorensonVRS discriminates against me by not replacing my VP200 with nTouchVP despite repeat asking for a replacement. That is mainly reason CSDVRS's proposal is really good and soluable to all the issue of interoperatible between VP to VP point plus e911 that is important as well.
