Deaf Advocate

Majority of Deaf thru U.S. are against the idea of changing the Video Relay Services that the Deaf have been using for a good while. We will fight hard against the idea of changing it to something else instead to something like the hearing. We are not hearing we are DEAF and we use American Sign Language as my first language. We are darn tired of you hearing control us and let us have what we have Video Relay Service and not use software. So leave as it is and we all Deaf are happy what we got. We came a long way to have Video Relay Service. VRS. We cannot help that the rate are very expensive. God made us Deaf to have better communication with qualified interpreters. Not lousy interpreter. If anything has changed then I will urge all Deaf to fight this battle. We are happy what we have now. Don't change anything. Leave it as is. We Deaf meant business. Leave the Video Relay Service alone. You dont want all Deaf protest against FCC. Just leave us alone and we are pleased with what we have now. Dont change anything.
