

Chairman Genachowski,

I'm a deaf person that really need to use VRS and rely on it because it benefit for me to contact to my family, business, and the community services. I'm asking you please do not remove the VRS because it has the best services to contact people. VRS is like a life to us and it benefit for all the deaf or hard of hearing all over in the U.S. If VRS become discontinued it will bring all of us back to the old time where there's no education can be developed for us. Education is important for any of us because it's give the best visual to see and learn the communcation and vocabulary. Again VRS is part of our life and its provide an excellent technology and it will lead us a better future.

Please Do NOT remove it. Marco Cristina
