

My comment : I want VRS to stay the way it is today dated 11/13/12 with a Sign Language Interpreter. The use of Webcam does not do it for me as the same to TTY without seeing his or her face dishonestly because I gave one unknown person my credit account for ordering my swimming suit and he or she used my number for buying the pizza without my authority through TTY. Dangerous to me. Now I do not have TTY of my own. Please ,Please save my VRS. Thank you for listening . Ella
