

Dear FCC:

I am concerned about your planned dramatic funding cuts to our current VRS services and instead of using new technology, you want to use off the self old technology. I am opposed to these changes and what we have now with VRS services are excellent and must continue. I am deaf myself and I depend on VRS services to call for my appointments and for my job purposes. Please do not change or cut into our current quality of VRS services.

Thank you,
Mark Suffridge
