

Chairman Genachowski,

I am a Deaf person who has and does rely on my VP for many years with Sorenson interpreters. Remember, I am not good at computers or setting up any VP's nor do I not want to wish to hire a technician to install any VP's that doesn't have a flasher to alert me when someone is calling me. It is most essential that I get the best Deaf/or Hard of Hearing technician to come out if my VP breaks down (doesn't work). I need to rely on him or her to use American Sign Language for my VP when for my business. I fully support this VRS program. I do not want to see this VRS program to be "shut down" if the FCC decides to do this, it will ruin my business. I do not want to see any changes when I use my own Sorenson VRS everyday as an ASL user.

Thank you for understanding.

Sincerely,

Jill C. Grimshaw, Deaf Sorenson VP 200 Flasher user Jill Grimshaw
