

We regret to inform you that your services are no longer needed by the USA. With an increased access of information and images, it appears that whether you like it or not, we are able to access these otherwise censored materials. You are doing nothing to keep what you don't want us to see censored and therefore, should be disallowed to assist america any further. Simply put, there is no need for censorship as it eventually becomes obsolete and does not matter to "protect" anyone mentally, let alone physically.
