Washington, DC 20554**

Re: DA 12-1863, IB Docket No. 12-340; RM-11683 Reply Comments

Dear Chairman Genachowski:

LightSquared has made a significant investment to develop their proposed network. The company has a plan that will serve as a major stimulant for our economy. It is my hope that the Federal Communications Commission will recognize this commitment and allow LightSquared to move forward.

I know Michigan and other states have been very active in encouraging companies to expand. The reason is simple, we need the jobs. Michigan has faced a very difficult economy for more than a decade with extremely high unemployment levels.

LightSquared is in a position to immediately provide economic growth when it is desperately needed. Michigan and the country need LightSquared and the economic benefits that will be forthcoming as they expand.

Please keep the economic benefits in mind as you review this matter.

Thank you for your time.

Sincerely,

A handwritten signature in black ink, appearing to read "Wm Kesto", written in a cursive style.

Dr. William Kesto
