Re: DA 12-1863, IB Docket No. 12-340, RM-11683 (Reply to Comments)

Dear Chairman Genachowski:

LightSquared's request to modify its license and enter a spectrum sharing agreement would be a big benefit for rural states like Arkansas. I believe numerous parties have already submitted supportive comments on LightSquared's efforts, and I would like to echo those sentiments. I have written to the Commission about this company before, and I continue to believe its vision for an innovative new network will help folks living in rural communities across the country. It would not only give these areas better access to reliable coverage, but customers would eventually see their bills go down, as well.

From what I gather, LightSquared has offered to give up its rights to terrestrial use of the spectrum that allegedly caused interference issues with GPS devices. That's a commendable gesture, and it would be a huge plus for the movement to conserve precious spectrum space in our country.

Please move quickly to address this matter.

I appreciate your time.

Sincerely,

Anne-Claire Allen
