

CERTIFICATE OF COMPLIANCE

Annual 47 C.F.R. § 64.2009(e) CPNI Certification

EB Docket 06-36

Annual 64.2009(e) CPNI Certification for 2013 covering the prior calendar year 2012

Date filed: January 15, 2013

Name of company covered by this certification: Georgia Public Web, Inc.

Form 499 Filer ID: 823878

Name of signatory: David Muschamp

Title of signatory: President and CEO

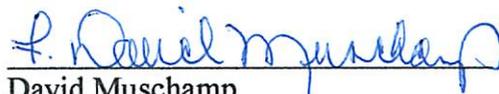

Certification:

I, David Muschamp, certify that I am an officer of Georgia Public Web, Inc. ("Company") and, acting as an agent of the Company, that I have personal knowledge that the Company has established operating procedures, summarized in the attached statement, that are adequate to ensure compliance with the customer proprietary network information ("CPNI") rules as set forth in Part 64, Subpart U of the Commission's rules, 47 C.F.R. §§ 64.2001 *et seq.*

Attached to this certification is an accompanying statement explaining how the Company's procedures ensure that the Company is in compliance with the requirements (including those mandating the adoption of CPNI procedures, training, recordkeeping, and supervisory review) set forth in section 64.2001 *et seq.* of the Commission's rules.

The Company has not received any customer complaints in the past calendar year concerning unauthorized release of CPNI. Company does not have any material information with respect to the processes pretexters are using to attempt to access CPNI that is not already a part of the record in the Commission's CC Docket No. 96-115. Company has therefore not taken any actions in the past year against data brokers, including proceedings instituted or petitions filed by the Company at either state commissions, the court system or at the Commission. The Company has established procedures to report any breaches to the FBI and United States Secret Service, and it has emphasized in its employee training the need for vigilance in identifying and reporting unusual activity in order to enable the Company to continue to take reasonable measures to discover and protect against pretexting and other unauthorized access to CPNI.

I hereby represent and warrant that the above certification is consistent with Section 1.17 of the Commission's rules, 47 C.F.R. § 1.17, which requires truthful and accurate statements to the Commission, and acknowledge that false statements and misrepresentations to the Commission are punishable under Title 18 of the U.S. Code and may subject the Company to enforcement actions.

David Muschamp
President and CEO
Georgia Public Web, Inc.
Executed January 15, 2013

CPNI Compliance Policies of Georgia Public Web, Inc.

Georgia Public Web, Inc. (“GPW”) has implemented the following policies and procedures to protect the confidentiality of Customer Proprietary Network Information (“CPNI”) and to assure compliance with the rules of the Federal Communications Commission (“FCC”) set forth in 47 C.F.R. Part 64, Subpart U, Section 2001 *et seq.*, including the FCC’s new rules adopted in *Implementation of the Telecommunications Act of 1996: Telecommunications Carriers’ Use of Customer Proprietary Network Information and Other Customer Information*, CC Docket No. 96-115, Report and Order and Further Notice of Proposed Rulemaking, FCC 07-22 (rel. April 2, 2007).

CPNI is “(A) information that relates to the quantity, technical configuration, type, destination, location, and amount of use of a telecommunications service subscribed to by any customer of a telecommunications carrier, and that is made available to the carrier by the customer solely by virtue of the carrier-customer relationship; and (B) information contained in the bills pertaining to telephone exchange service or telephone toll service received by a customer of a carrier.”

GPW’s policy is administered by its CPNI Compliance Officer David Muschamp, President and CEO.

I. USE, DISCLOSURE OF, AND ACCESS TO CPNI

GPW is primarily a wholesale carrier that provides service to other telecommunications carriers and communications service providers, rather than end-user consumers. In accordance with Section 222(b) of the Act, 47 U.S.C. § 222(b), when GPW receives or obtains proprietary information from another carrier for purposes of providing a telecommunications service, it only uses such information for such purpose, and does not use such information for its own marketing efforts.

GPW also provides a limited number of retail data telecommunications services to business customers. GPW may use, disclose, or permit access to CPNI only in its provision of the communications service from which such information is derived; for services necessary to, or used in, the provision of such communications service, including to initiate, render, bill and collect for telecommunications services; to protect the rights or property of GPW, or to protect users or other carriers or service providers from fraudulent, abusive or unlawful use of, or subscription to, such services; to provide installation, maintenance, or repair services; as required by law; or as expressly authorized by the customer.

GPW does not use, disclose or permit access to CPNI to identify or track customers that call competing service providers.

GPW does not use CPNI to market its services. In the event that any employee or agent wishes to use CPNI for marketing or to seek customer approval for such use, such proposed use would be subject to a supervisory review process that shall involve the CPNI Compliance Officer. If such use is approved, GPW shall modify these policies and conduct additional training as needed to assure compliance with the FCC’s rules.

II. SAFEGUARDS AGAINST DISCLOSURE OF CPNI TO UNAUTHORIZED PARTIES

GPW will take reasonable measures to discover and protect against attempts to gain unauthorized access to CPNI. If any employee becomes aware of new methods that are being used or could be used by third parties to attempt to obtain unauthorized access to CPNI, or of possible changes to GPW's existing policies that would strengthen protection of CPNI, they should report such information immediately to GPW's CPNI Compliance Officer so that GPW may evaluate whether existing policies should be supplemented or changed.

To prevent unauthorized access to CPNI, GPW employees must use a unique login and password to obtain access to databases that include CPNI.

Pursuant to 47 C.F.R. § 64.2010(g), the FCC's authentication requirements for disclosure of CPNI do not apply to business customer accounts where the business customer has a dedicated account representative and a contract with GPW that specifically addresses GPW's protection of CPNI. Except as permitted by this business customer exemption, GPW does not disclose CPNI to any inbound telephone caller or any visitor to an GPW retail office, and does not provide online access to any account that provides access to CPNI.

When a customer's address of record is created or changed, except when customer initiates service, GPW will send a notice immediately to customer's preexisting address of record notifying them of the change. These notifications will not reveal the changed information, and will direct the customer to notify GPW if they have any questions.

III. REPORTING CPNI BREACHES TO LAW ENFORCEMENT

Any GPW employee that becomes aware of any breaches, suspected breaches or attempted breaches must report such information immediately to the GPW CPNI Compliance Officer, and such information must not be reported or disclosed by any employee to any non-employee, including the potentially affected customer, except in express conformance with the procedures described below. Any employee that fails to report such information will be subject to disciplinary action that may include termination.

It is GPW's policy that employees should not be discouraged from reporting information about breaches that may have been caused in part by their own actions or omissions. Once a breach has occurred, the most important objective is to attempt to limit the damage to customers, make any adjustments as needed to prevent a recurrence of the breach, and to alert law enforcement promptly. Therefore, although employees who violate GPW's CPNI compliance procedures are subject to discipline, the sanctions may be substantially reduced where employees promptly self-report violations if appropriate.

Nothing in this policy authorizes any employee to violate Georgia law. In the event of an apparent conflict between Georgia law and the FCC's CPNI requirements or the requirements of this policy, the GPW CPNI Compliance Manager will consult the GPW's legal counsel.

A. Identifying a “Breach”

A “breach” has occurred when a person, without authorization or exceeding authorization, has intentionally gained access to, used, or disclosed CPNI. If an employee has information about an incident and is not certain that the incident would not constitute a breach under this definition, the incident must be reported to the CPNI Compliance Officer.

If an GPW employee determines that an unauthorized person is attempting to gain access to CPNI but does not succeed at doing so, no breach has occurred. However, the incident must be reported to GPW’s CPNI Compliance Officer who will determine whether to report the incident to law enforcement and/or take other appropriate action. GPW’s CPNI Compliance Officer will determine whether it is appropriate to update GPW’s CPNI policies or training materials in light of any new information; the FCC’s rules require GPW on an ongoing basis to “take reasonable measures to discover and protect against activity that is indicative of pretexting.”

B. Notification Procedures

As soon as practicable, and in no event later than 7 business days upon learning of a breach, the GPW CPNI Compliance Officer shall electronically notify the United States Secret Service (USSS) and the Federal Bureau of Investigation (FBI) by accessing the following link: <https://www.cpnireporting.gov>. GPW’s FRN number and password may be required to submit a report. If this link is not responsive, they should contact counsel or the FCC’s Enforcement Bureau (202-418-7450 or <http://www.fcc.gov/eb/cpni>) for instructions.

GPW will not notify customers or disclose a breach to the public until 7 full business days have passed after notification to the USSS and the FBI, except as provided below (a full business day does not count a business day on which the notice was provided). If GPW receives no response from law enforcement after the 7th full business day, it must promptly proceed to inform the customers whose CPNI was disclosed of the breach.

GPW will delay notification to customers or the public upon request of the FBI or USSS.

If the GPW Compliance Officer believes there is a need to disclose a breach sooner, he or she should so indicate in the notification to law enforcement. However, such notification does not itself permit notice to customers; GPW still may not notify customers sooner unless given clearance to do so from both the USSS and the FBI.

IV. RECORD RETENTION

The CPNI Compliance Officer is responsible for assuring that GPW maintains for at least two years a record, electronically or in some other manner, of any breaches discovered, notifications made to the USSS and the FBI pursuant to these procedures, and notifications of breaches made to customers. The record must include, if available, dates of discovery and notification, a detailed description of the CPNI that was the subject of the breach, and the circumstances of the breach.

GPW maintains a record, for a period of at least one year, of those limited circumstances in which CPNI is disclosed or provided to third parties, or where third parties were allowed access to CPNI.

Because GPW does not use CPNI for marketing or for any other purpose for which customer approval is required, it does not have any records to keep regarding supervisory review of marketing; or of sales and marketing campaigns that use CPNI; or of records associated with customers' "opt-out" approval or non-approval to use CPNI, or notification to customers prior to any solicitation for customer approval to use or disclose CPNI.

GPW will maintain a record of any customer complaints related to their handling of CPNI, and records of GPW's handling of such complaints, for at least two years. The CPNI Compliance Officer will assure that all complaints are reviewed and that GPW considers any necessary changes to its policies or practices to address the concerns raised by such complaints.

GPW will have an authorized corporate officer, as an agent of the company, sign a compliance certificate on an annual basis stating that the officer has personal knowledge that GPW has established operating procedures that are adequate to ensure its compliance with FCC's CPNI rules. The certificate for each year will be filed with the FCC Enforcement Bureau in EB Docket No. 06-36 by March 1 of the subsequent year, and will be accompanied by a summary or copy of this policy that explains how GPW's operating procedures ensure that it is in compliance with the FCC's CPNI rules. In addition, the filing must include an explanation of any actions taken against data brokers and a summary of all customer complaints received in the past year concerning the unauthorized release of CPNI. Confidential portions of these submissions shall be redacted from the public version of the filing and provided only to the FCC.

V. TRAINING

All employees with access to CPNI receive a summary of GPW's CPNI policies and are informed that (i) any use or disclosure of CPNI or other act or omission not in compliance with such policies will result in disciplinary action, including the termination of employment where appropriate, and (ii) employees who knowingly facilitate the unauthorized disclosure of a customer's confidential information may be subject to criminal penalties. In addition, GPW requires CPNI training for all CSRs, personnel at retail offices that may receive requests for CPNI, and marketing personnel.
