Re: Reply Comments regarding DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Chairman Genachowski:

Brown Property Maintenance of Central Ohio specializes in repairs and construction products to ensure that abandoned or soon to be short sale homes are up to code and able to be transferred. This is a critical service as it ensures that homes can become occupied and not left abandoned and lead to blight in the area.

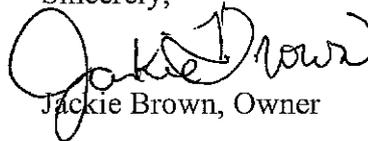

In this type of business, surprises lurk around every corner and may require parts or other contractors immediately. Having access to a reliable network with today's smartphones allow me to address issues in a moment's notice with the web being at my fingertips; unless, of course, I am outside of the Columbus metropolitan area. At that point, reliable access becomes less certain.

The proposal from LightSquared is exciting: access regardless of location because of their proposed satellite network means that geography will not dictate access to wireless broadband. Businesses like mine can worry less about the location we are in and focus more on providing the services we were hired to perform.

It should also be noted that by bringing another provider into the broadband market, services on the aforementioned smartphone become better and more cost effective. Competition breeds benefits for the end consumer and this would be no different.

I ask you and the FCC to approve the LightSquared application as soon as reasonably possible so as to not further delay the building of LightSquared's network.

Sincerely,

Jackie Brown, Owner
