

# Advantage Reporting

1842 Autumn Glen – Howell, MI 48843

January 24, 2013

The Honorable Julius Genachowski, Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: DA 12-1863, IB Docket No. 12-340; RM-11683 Reply Comments

Dear Chairman Genachowski:

As president of Advantage Reporting, a court reporting firm base out of Michigan, we rely on cutting edge technology. "Real Time" reporting gives our clients a unique experience and allows them to save money on court costs during pre trial depositions. In order to do this however, we have to be online.

We need new companies to provide mobile broadband network services. There is spectrum available and it should be used to benefit the public. By not fully utilizing this resource we are losing out on jobs that are much needed in Michigan and across the company.

LightSquared has a license modification application pending before the FCC that should be approved. The company has made a creative proposal that will address any prior technical concerns. Once they receive FCC approval the benefits will start and most importantly that includes employment for many in a variety of different areas.

The comments on LightSquared have been very positive from a number of different sources. It is now time to act and approve their request.

Thank you.

Sincerely,

Brian Brownstone
