Re: DA 12-1863, IB Docket No. 12-340; RM-11683 Reply Comments

Dear Chairman Genachowski:

As a former state representative and current township supervisor in an area where many people were forced to retire or flat out lost their job, we need to promote new opportunities.

Competition and innovation are two of the key ingredients that are needed for new employment and a positive impact on our economy. LightSquared has a license modification application before your agency that will greatly help us on the economic front.

The wireless industry has been a great boost to our economy creating many new opportunities for companies and the jobs associated with that growth. There is much more that needs to be done and LightSquared's proposal should be approved so that even greater economic growth can be realized.

While anytime we can have increased employment is good, now it is especially true across the country and especially in Michigan. Every part of the country has at least a few jobs tied to this industry. Even the smallest towns usually have a business that sell something related to wireless service.

Please allow LightSquared to move ahead, we need the jobs.

Thank you.

Sincerely,

T. David Law, Commerce Township Trustee
