

As a dedicated Christian living in Denton, TX, I am concerned about the future of the many Christian low power television broadcast stations positively influencing our nation and our hometown. Our local LPTV station must be protected. As a Christian, I am concerned that any loss of LPTV service will mean a reduction in the availability of broadcast content that brings hope and positive values to our daily life. I believe the Christian message is important because our nation was founded on Christian principles. The more we depart from our founding principles the more substance abuse, violence, child abuse, and other destructive crimes are prevailing in our nation. These LPTV stations are performing an invaluable service to our nation - educating Americans about our roots, and encouraging us to embrace values of respect for others and of everything that is noble and good. Most often, the cable and network television channels fail to represent Christian values and even actively promote harmful values in their content. We want the future of Christian TV broadcasting to be protected because otherwise the main voices Americans will hear are the voices of big money communications companies that cater for profit to people's basest desires. To eliminate these LPTV stations would be like removing the moderator rods from a nuclear reactor ? I fear that without moderating voices on the airwaves our society may suffer a runaway chain reaction of degradation of everything noble and good. Please do not permit Christian voices to be silenced through the loss of LPTV stations as a result of the planned auction or repack. Low-power TV stations that have operated in good faith and have complied with their license should be protected and kept on the air.
