AFFIDAVIT OF ADRIANA MARTIN DEL CAMPO

State of California

Los Angeles County

I, Adriana Martin Del Campo, attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Adriana Martin Del Campo. My address is 2501 W. Sunflower Ave. F8, Santa Ana, CA 92704
2. I am a concern mother of 4 children and I am also involve in my community has a Parent Promoting Education. I am also a trainer with NIU initiative, sharing my computer knowledge with parents how in many cases had never touch a computer and also have the lack of language skills to communicate their worries and or talk to their kidsøteachers and school counselors.
3. I was shocked to learn that RF Guidelines have been set without the benefit of credible studies performed on the health impact to humans, animals, and environment relative to RF impact.
4. I have been involved in the program Padres Promotores de la Educación for 9 years reaching out about 30 families per month, and with NIU Initiative for about 6 months having 1 group of parents trained with computers and working with a second group.

5. I have shared valuable information though out my community on who to guide our children to Higher Education and my vision is to continue in this path as well as a trainer with NIU.

6. There are compelling arguments supporting the FCC modify RF Guidelines mandating inclusion of credible studies performed on the health impact to humans, animals, and environment relative to RF impact, and that those guidelines work to prevent or minimize negative impacts.

7. Over two (2) million viewers/subscribers have seen and/or read about the positive impact One Million NIU has had on families and community relative to empowering NIU's (New Internet Users) to early adaption of on-line resources for improved quality of life.

8. The documentary by James Russell, [Resonance of Beings of Frequency](#)(Nov2012) explains well the impact RF waves have on the very existence of life and how the Earth's magnetic field's share space with RF waves. They must co-exist, to stymie the Earth's delicate balance of these waves threaten the very existence of life. Such hypothesis warrants inclusion in considering RF Guidelines.

9. Dr. Roger Coghill, Bioelectromagnetic research, "the radiation environment has increased many millions of times from what it was 30 years ago." Understanding the impact of this "million times increase" is worthy of consideration into the writing of RF Guidelines, as it is hypothesized to have negative health impacts.

Respectfully submitted by

Adriana Martin Del Campo
