AFFIDAVIT OF

State of Michigan]

Oakland County]

I, Jennifer Zmarzlik, attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Jennifer Zmarzlik . I live in Madison Heights, Michigan 48071.
2. I am disabled with nerve damage.
3. I am unable to be in direct contact or near any wireless devices without extreme pain occurring.

Wireless is microwave technology and is not monitored by the FCC in its' current usage levels in the public or private sector. There are no limits or standards for the application of this technology which curb or stop business use, personal use and military use for the safety of our citizens. Any party desiring to use this technology for their own purposes is able to tap into the grid and use it for reasons good or bad. In my county the entire traffic light system is becoming a fully wireless system. The state of Michigan is planning on using this technology in every government system. What is going to happen when interference from the manufacturing plant next door or the cell phone store on the corner is bombarding the frequencies and the traffic lights are overloaded and burn out. Drivers will be paying even higher rates for the collisions occurring because the lights are erratic. The insurance companies will need a good reason to pay out the claims yet find a responsible party and that could be the government officials who decided it was cheaper to go the wireless route instead of continuing the old standard wired system. There are too many possible scenarios for lawsuits when a city, county, state or business make decisions based on a less expensive plan with wireless. Governments must be informed of the dangers of overloading the wireless system. The wireless companies are not

disclosing the safety issues although the studies have been completed by the correct sciences.

I am very concerned with the non-thermal but destructive abilities of the microwaves. I physically sense when I am near a wireless device. My skin and nervous system begins a burning sensation that does not go away until I am away from the device near me. At this point, almost all citizens use cell phones, wireless computers, and smart meter technology and there isn't any way to keep myself away from them. Cell towers are also a major concern as they are in every city and state, even the most remote areas. Cell tower antennae are found even on apartment buildings, hospitals and in any place they can sell the idea to unsuspecting customers. I can also sense the hidden antennae that are put in buildings just by the burning sensation and high pitched noises I hear with my sensitive hearing. Hidden antennae are even more of a problem as one cannot seem to find the reason for one's unusual physical feelings or cancer causes, and they are no standards for disclosure.

The specific absorption rate science that is currently used by cell phone companies is not taking into consideration many factors. First, is the test dummy they use is not an actual human being. It is a piece of plastic with fluid inside. It is not electric like a human being. It is the electric part of a living being that is affected by these frequencies. When using a cell phone your head is not heating up from direct heat but from the overloading of radiation to the electricity in the body. Cell towers also send this same radiation out for miles, 24 hours a day, every day. This radiation is hitting every human, every animal, every insect and plants. Constant pressure will cause failure at some point. Please refer to the Specific Absorption Data at the following link:

<http://www.thermoguy.com/blog/index.php?itemid=112>

I would like to refer you to O.S.H.A. Occupational Safety & Health Administration's web site and it's documentation on the safety standards for radio frequency radiation. This will directly affect all unions, government offices and the private sector. It will be an issue with Workman's Compensation in every state of the union. There will need to

be a responsible party or parties for the decisions made to use wireless instead of a wired system. City Halls are usually base stations for the police, firefighters, and all government officials as well as community centers where children play. In my state all the cities are following the same procedure and putting cell towers with an unlimited amount of cell antennae right in the center of their buildings, and may be possibly putting antennae on the opposite wall where offices are, not always on the cell tower above. And yet they are still not being informed of the harm it can do to one's body. Again, companies are not required to disclose this information even to government officials. Hospitals and office buildings are putting cell antennae on the top of the buildings they own and on the sides of the offices with no protection from the large amounts of radiation. I shudder at the thought of the lawsuits when unions discover O.S.H.A. standards are not being followed.

The link is <http://www.osha.gov/SLTC/radiofrequencyradiation/index.html>

The American Disabilities Act is also a factor in your decision. Disabled people with nervous system disabilities, pacemakers or electronic devices in their bodies will be affected immediately by direct hits of microwave technology. Pacemakers will go offline and/or stop completely. People with nervous system problems will become unnerved and act out because they cannot think clearly. People with brain chips to help them function with prosthesis or manage cerebral palsy will be unable to stabilize the computers in their bodies. Protection for this group is essential for the stability of living optimally.

The link for the American Disabilities Act is: <http://www.ada.gov/>

These technologies are not a wired system. We become the wires, the circuit for the information to travel through. Our bodies will be overloaded with electromagnetic energy to the point of failure if there are no standards or limits put in place by the FCC.

The solution is to wire everything. Using wireless is extremely inexpensive compared to a wired system and is the reason all governments, business and personal homes are choosing to use it. Wireless is inexpensive now, however, the consequences financially of the overloading of this technology is going to be catastrophic in punitive damages.

The cancer causing agents, the accidental burning of homes, businesses, and the disabling effects of all living beings ability to function at normal levels will be hindered. The frequency interference is also an issue as there are no jurisdictional lines or laws set for this technology. Please reference a blog at this link: <http://www.thermoguy.com/blog/> which explain alternatives to wireless A wired system may cost more but according to the National Electric Code for the United States and Safety Code 6 of Canada wireless systems are unable to remain stable and there will be cause and effect scenarios as a result.

Please enact new and safe standards for all businesses, government at all levels, personal use and military for the safety of our citizens.

Respectfully submitted by

Jennifer Zmarzlik
