EB Docket No. 06-36 Statement

OneLink Communications, Inc. does not have access to its customers' CPNI as it is a non-facilities based switchless reseller of residential long distance service which purchases subscriber list information (i.e., names, addresses and phone numbers), which is not considered CPNI information, from a marketing leads firm. The company's underlying carrier is Qwest Communications. The company does not have access to a customer's call detail records. Customer bills are processed through BSG Services, a third-party billing aggregator, who forwards billing information to the customer's Local Exchange Carrier for inclusion on the their local telephone billing.

OneLink Communications, Inc. markets only residential long distance service and does not sell any kind of equipment or any other type of service. Customer calling records are maintained on the company's stand-alone server which is not connected to a third party.

In summary, OneLink Communications, Inc. does not need or have access its customers' CPNI, as the company does not market additional services or equipment, it has no joint venture partners and does not require independent contractors. CPNI, such as opt-in/opt-out records and actual customer bills, are maintained by the customer's Local Exchange Company, and OneLink has no access to this information.
