

Progressive Cable Communications, Inc., hereby submits its comments to Proceeding Number 12-268 and urges the commission to reconsider its rule making for the following reasons:

1. The shortage of wireless spectrum is unproven and highly unlikely to exist.
2. Under the Constitution, the spectrum of low power television stations must be protected.
3. Implementation of proposals in this proceeding is not only unnecessary and counterproductive but also contrary to the public interest and the Commission is urged to promptly close this proceeding and abandon its plan to take television spectrum from broadcasters.

Respectfully submitted,

Progressive Cable Communications, Inc.

By its President

Steve Houston
