

I depend on my marine GPS to navigate my boat. Although I have charts available, I depend on the GPS to confirm my current position.

I am concerned that if the GPS is at risk, the risk to me and my property is increased.

Wireless broadband service is important, but it should not come at the expense of GPS.

All the studies show that LightSquared's proposed network would cause interference and that there are no remedies.

I rely on you, the FCC, to protect the integrity of the GPS signal and that you support their recommendation to stop LightSquared's current proposal.
